DATASHEET | NORWEGIAN PUBLIC SECTOR

Cyber Threat Intelligence

Transforming raw data into actionable insights.

Bitsight Cyber Threat Intelligence gives security teams the visibility they need to prioritize real risk.By linking threat intelligence directly to your organization's attack surface, you'll gain real-time insight into emerging threats, adversary activity, and exposed assets—so you can respond faster and smarter.

Core Capabilities & User Value

Fast Threat Intelligence Collection:

Continuously ingests, extracts, and indexes CTI from clear, deep, and dark web sources—including invite-only forums, leak sites, and chat channels—delivering raw findings into the portal in under 1 minute to help teams to identify real-time risks before attacks escalate.

Extended Attack Surface Correlation:

Continuously discovers and maps internet-facing assets (IPs, domains, software), ensuring alerts and threat feeds are automatically scoped, prioritized, and contextualized specifically to your entity's digital footprint.

Predictive Vulnerability & Risk Prioritization:

Combines machine-learning analytics with continuously updated predictive scores to rank CVEs based on real-world exploitability and activity and APT associations, eliminating low-priority noise.

Embedded Generative AI:

Accelerates triage and response by automating complex query investigations into natural language, synthesizing threat intelligence into human-readable narratives, and generating custom, role-specific reports (from SOC-level details to C-suite summaries) on demand.

Actionable Identity & Brand Defense:

Monitors underground markets and stealer logs for compromised credentials and domain access for sale, pairing continuous exposure tracking with integrated takedown workflows for brand impersonations, rogue apps, and phishing sites.

Dynamic Framework Mapping & Multi-Tenant Sharing:

Maps real-time adversary activity, tactics, and IOCs directly to the MITRE ATT&CK framework. Supports multi-tenant role-based delivery, customizable alert feeds integrations for seamless distribution to external entities, national CERTs, or internal security stacks.

Cyber intelligence at scale

We track 700+ APT groups, 4,000+ malware types, 95M threat actors, 6M unique IOCs, and 1B compromised credentials weekly. Enriched with context, this data gives security teams insight into threat origin and intent – delivered in under a minute following collection – to detect and stop attacks before they strike.

>7M
Intelligence items curated per day

1000+
Underground forums and marketplace crawled

1B+
Compromised credentials collected daily

< 1 min
From data collection to item display and alert

See the full scope of Bitsight CTI use cases

USE CASE	HOW BITSIGHT CTI HELPS	OPERATIONAL LEVEL	RELEVANT PERSONAS
Identity (Credentials) Intelligence	Detect and manage compromised credentials, with optional access to purchase exposed data for further investigation.	Tactical, Operational	Intel Team, SOC, CSIRT, Fraud Teams
Vulnerability Intelligence	Prioritize vulnerabilities based on exploitability insights to guide patching and mitigation efforts.	Operational	Vulnerability Management Teams
Adversary (Threat) Intelligence	Track APTs, malware, ransomware, and threat actor TTPs to stay ahead of emerging threats.	Tactical, Operational	Intel Team, SOC, CSIRT, Threat Hunters
Attack Surface Intelligence	Identify and assess risks across known and unknown assets, including domains, IPs, and more.	Tactical, Operational	Intel Team, SOC Engineer, CSIRT
Ransomware Intelligence	Monitor ransomware activity, leak sites, and group behaviors to strengthen detection and response.	Strategic, Operational, Tactical	C-level Execs, Intel Team, SOC, CSIRT
Brand & Phishing Intelligence	Detect impersonation attempts, phishing threats, and rogue apps targeting your brand or executives across social media and the web.	Strategic, Operational, Tactical	C-level Execs, Consultants, SOC, Brand Protection, CSIRT, Intel Team
Geopolitical Intelligence	Analyze global events and trends to assess potential risks and impacts across sectors.	Strategic	C-level Execs, Consultants, Customers
Fraud Intelligence	Uncover patterns in credit card theft, insurance fraud, and scams to prevent financial loss.	Tactical, Operational	Fraud Team, Intel Team, SOC, CSIRT
Cybercrime Intelligence	Monitor and disrupt criminal networks engaged in illicit online activity.	Strategic	C-level Execs, Consultants
3rd Party (Supply Chain) Intelligence	Evaluate third-party risk posture, practices, and compliance to protect your ecosystem	Strategic, Operational	C-level Execs, Consultants, Customers

Bitsight is the global leader in cyber risk intelligence, leveraging advanced AI to empower organizations with precise insights derived from the industry's most extensive external cybersecurity dataset. With more than 3,500 customers and 65,000 organizations active on its platform, Bitsight delivers real-time visibility into cyber risk and threat exposure, enabling teams to rapidly identify vulnerabilities, detect emerging threats, prioritize remediation, and mitigate risks across their extended attack surface.
